

## Immunization Policy

Students matriculating at O'More College of Design are required to have the following immunizations: DPT series with current Td or Tdap booster (within 10 years), polio series; and two measles, mumps and rubella (MMR) injections after the first birthday. Immunization for hepatitis A & B, meningitis and chicken pox, while not required, are highly recommended. Also recommended is the human papilloma virus vaccine. Students should submit their shot records on the appropriate O'More College Form with the shot record complete and/or with a print out from their doctor's office or Health Department.

Exceptions to this policy may be made for a documented allergy to substances in one or more of these vaccines or on the basis of a sincere and genuine religious belief prohibiting a particular immunization. Such a medical or religious waiver must have signed on the appropriate O'More College form at the time of enrollment.
